

A report on “Healthy and Strong with Plants”

Place: Online Platform

Date: 2nd April 2025

Time: 06:00 pm to 06:45 pm

National Service Scheme (NSS) Unit of ATMECE in collaboration with Vegan Outreach (International Non-Governmental Organization) organized a webinar on the topic “Healthy and Strong with Plants”. It was organized to achieve a healthy and strong lifestyle with plants, focus on incorporating a plant-based diet rich in fruits, vegetables, and fiber, while also considering the benefits of gardening and spending time with nature to reduce stress and improve overall well-being.

Vegan Outreach India collaborated with universities across India to host educational webinars, engaging over 7,000 students and achieving 92.5% agreement on the need to change diets for animal, planet, and health reasons.

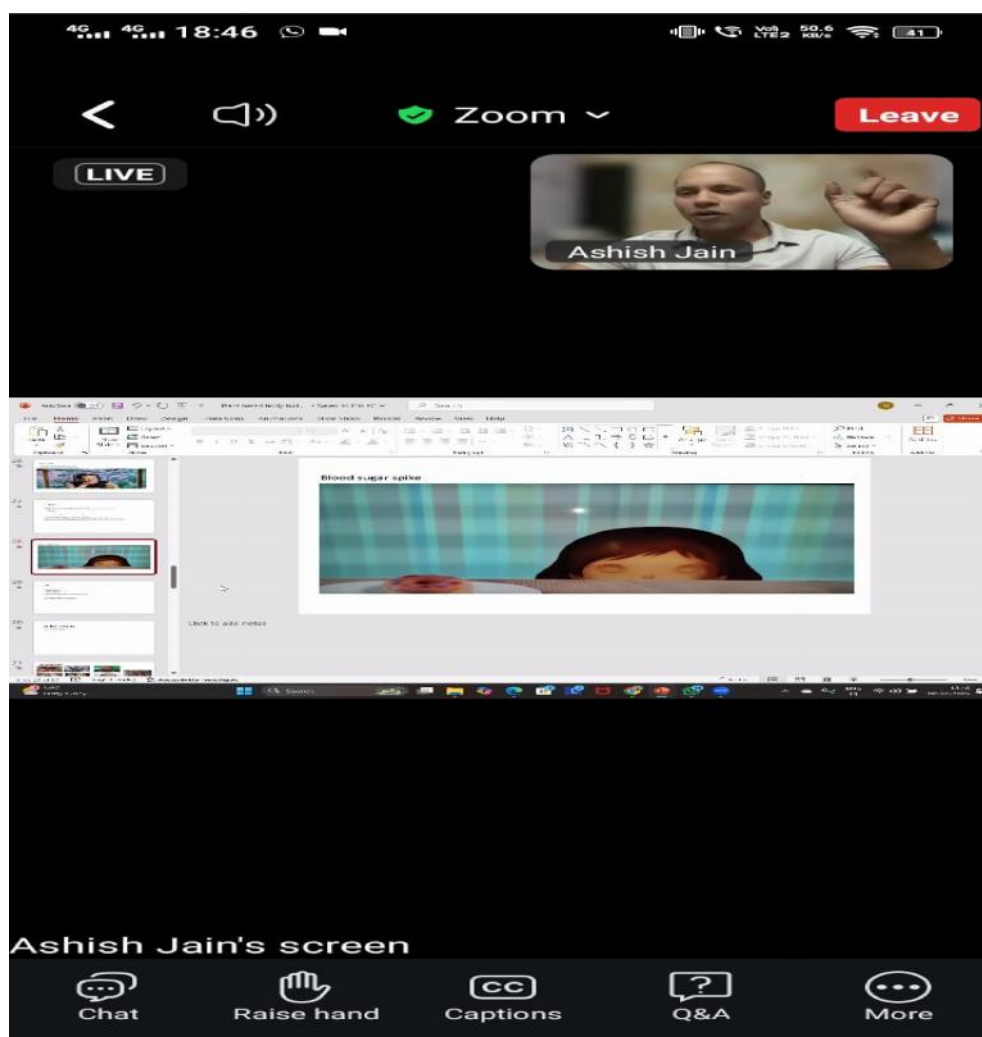

A well-planned vegan diet can be both healthy and provides the nutrients needed for strength, offering benefits like reduced risk of certain diseases and lower body mass index, but requires careful attention to ensure adequate intake of certain nutrients like vitamin B12, vitamin D, calcium, and iodine.

On this occasion, esteemed speaker Mr. Ashish Jain, a plant based nutrition consultant and vegan body builder. Ashish has been following a vegan lifestyle for the last 15 years and coached many to achieve their fitness goals and highlighted the importance of healthy and strong with plants with following points.

- **Food Source:** Plants are the primary source of food for humans and animals, providing essential nutrients and calories.
- **Medicines:** Many plants have medicinal properties, providing treatments for various ailments.
- **Oxygen Production:** Plants absorb carbon dioxide and release oxygen, which is vital for human and animal respiration.

- **Air Quality:** Healthy plants purify the air by absorbing pollutants and releasing oxygen.
- **Mental and Physical Health:** Gardening and spending time around plants can reduce stress, improve mood, and boost creativity.
- **Boosts Air Quality:** Plants can improve indoor air quality by absorbing pollutants and releasing oxygen.
- **Promotes Exercise:** Gardening provides physical activity, which is beneficial for overall health.

Around 190 students of ATMECE have attended the webinar on the topic “Healthy and Strong with Plants”. The program was coordinated by Mr. Rudresh A N, NSS Program Officer under the guidance of Dr. L Basavaraj, Principal, Dr. Srinivasa S, Dean-Student Affairs, ATMECE.
