

A report on “Palliative Care”

Place: ATMECE, Mysuru

Date: 29th March 2025

Palliative care is an approach that improves the quality of life of patients (adults and children) and their families who are facing problems associated with life-threatening illness. It prevents and relieves suffering through the early identification, correct assessment and treatment of pain and other problems, whether physical, psychosocial or spiritual.

Addressing suffering involves taking care of issues beyond physical symptoms. Palliative care uses a team approach to support patients and their caregivers. This includes addressing practical needs and providing bereavement counselling. It offers a support system to help patients live as actively as possible until death.

Mr. Ramakrishna Mudre, Honorary Director, Swami Vivekananda Youth Movement (SVYM), Mysuru addressed the Faculties and highlighted in detail the importance of Palliative Care with the following goals.

Key Goals:

- **Relieve Suffering:** To alleviate pain and other distressing symptoms.
- **Improve Quality of Life:** To enhance the patient's overall well-being.
- **Support Patients and Families:** To provide emotional, social, and spiritual support to patients and their families.
- **Facilitate Communication:** To help patients and families make informed decisions about their care.
- **Coordinate Care:** To ensure that patients receive the right care at the right time.

Around 100 Teaching and Non-teaching Staffs of ATMECE have attended the Palliative Care Awareness program. The program was coordinated by Mr. Rudresh A N, NSS Program Officer under the guidance of Dr. L Basavaraj, Principal, Dr. Srinivasa S, Dean-Student Affairs, ATMECE.
