— THE AIML CHRONICLE — NEWSLETTER

VOLUME 2 - ISSUE 1 , JANUARY 2026

DEPARTMENT OF
COMPUTER SCIENCE ENGINEERING

ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING

"The true power of intelligence lies not just in knowing more, but in understanding how to use what we know with empathy, responsibility, and purpose. As technology grows stronger, so must our wisdom. Progress has meaning only when it uplifts humanity, not when it replaces it."

— Stephen Hawking

About “The AIML Chronicle”

The AIML Chronicle is the official newsletter of the Department of Computer Science and Engineering – Artificial Intelligence and Machine Learning (CSE–AIML). Designed by students, for students, it serves as a creative and informative platform that highlights the latest happenings, achievements, innovations, and insights from the world of AI and ML. From technical articles and project showcases to event coverage and student contributions, The AIML Chronicle captures the pulse of our tech-driven community and fosters a culture of learning, curiosity, and collaboration.

About The Department

The Department of Artificial Intelligence and Machine Learning (AIML) at ATMECE is committed to delivering high-quality technical education at the undergraduate level. Our faculty members strive to equip students with expertise in AI and ML to address real-world challenges. The department is well-equipped with modern computing facilities to meet academic and industry demands. AIML enables the development of intelligent systems like chatbots, virtual assistants, and educational tools that support learning in areas such as history and science.

Our objective is to offer experiential learning through hands-on projects, research, and internships, building a solid foundation for global careers. At ATMECE, we emphasize enhancing student learning through value-added courses, skill development programs, and participation in technical events and hackathons nationwide.

The AIML department fosters a culture of teamwork, support, and mutual trust among students, faculty, and staff. Our focus on constructive engagement helps create better employment opportunities and shapes students into responsible citizens, contributing to a better India and a better world.

Vision of the Department

To impart technical education in the field of Artificial intelligence and machine learning of topnotch quality with a high level of professional competence, social obligation, and global cognizance among the students.

Program Educational Objectives (PEOs)

PEO1: Graduates will be able to hone their problem-solving abilities and capacity to offer solutions to challenges that arise in the actual world.

PEO2: Able to design and develop AI based solutions to real-world problems in a business, research, or social environment.

PEO3: Graduates shall acquire and inculcate corporate culture, core attributes, and leadership qualities as well as professional etiquette's and lifelong learning..

Mission of the Department

To impart technical education that is up to date, relevant and makes students to compete at global level
Fostering an ambiance where students can adopt the suitable moral, intellectual, emotional, and physical attributes to shine as the leaders of tomorrow's society

To strive to meet ever higher educational standard

Program Specific Objectives (PSOs)

PSO1: Ability to design and develop artificial intelligent based solutions by applying optimal algorithms to to solve real world issues.

PSO2: Ability to apply suitable AI tools and techniques to offer solutions in the various domains of engineering

MESSAGE FROM PRINCIPAL

ATMECE has emerged as a prominent institute offering quality education. All round continuous changes in infrastructure and academics standard have helped us to build a brand name. It gives me immense pleasure to introduce the Volume 1, Issue -1 of the half yearly newsletter "THE AIML CHRONICLE" of Computer Science and Engineering (AI&ML) Department. I am pleased to know that the newsletter will showcase the activities and credentials of CSE(AIML) department. I hope this will become a platform for students and staff to exhibit their talents in science and technology. On behalf of management, I appreciate the newsletter committee for their efforts in bringing out this edition

– Dr L Basavaraj , Principal , ATMECE

MESSAGE FROM HOD

It gives me immense pleasure to introduce The AIML Chronicle, a student-driven newsletter that showcases the creativity, talent, and technical spirit of our CSE-AIML department. This platform reflects our commitment to innovation, knowledge sharing, and holistic growth in the exciting world of Artificial Intelligence and Machine Learning. I congratulate the editorial team and encourage all students to contribute and stay inspired.

– Dr Anil Kumar C J , HOD, CSE-AIML, ATMECE

Year	Activities	Name of the faculty
2025	Recognized as NPTEL Star in July-Dec 2025 (NPTEL Believer)	Dr Uma Mahesh R N
2025	Recognized as NPTEL Star in July-Dec 2025 (NPTEL Discipline Star)	Khateeja Ambareen

Department Activities

The TechSphere HackQuest

The TechSphere event took place on October 29, 2025, at ATME College of Engineering, organized by the IET ATME OnCampus Student Chapter in collaboration with the Department of Artificial Intelligence and Machine Learning (AIML). Running from 3:00 PM to 4:30 PM, the event featured six levels of problem-solving challenges, each with a time limit of 3-4 minutes. Participants were given envelopes containing sheets with specific problems, and they had to identify a "keyword" after solving each problem, adding an exciting layer of complexity.

The final level required teams to compile the correct keywords from all previous levels to determine the ultimate answer. The winning team, comprised of first-semester Electronics and Communication Engineering (ECE) students - Niharika L, Prathima B M, Sahana H R, and Sinchana H R demonstrated exceptional teamwork and problem-solving skills, earning recognition for their efforts. E-Certificates were awarded to all participants, celebrating their hard work and dedication.

The event fostered a spirit of collaboration and innovation, encouraging students to enhance their critical thinking and teamwork abilities. Faculty members, including Dr. L Basavraj, Anil Kumar CJ, and Prof. Khateeja Ambareen, provided valuable support throughout the event. Overall, TechSphere was a successful initiative that inspired students to explore technology and engineering while honing their skills for future challenges.

Department Activities

The TechSphere CodeMoji

The TechSphere event was held on November 19, 2025, at ATME College of Engineering, Mysore, affiliated with VTU and approved by AICTE. The event aimed to enhance problem-solving skills through engaging activities that fostered teamwork and creativity.

The event consisted of three rounds. Round 1, "Emoji Decoder," featured 10 technical emoji questions displayed on a projector, where participants decoded emojis to identify technical terms. All teams qualified for Round 2 due to the straightforward nature of the questions. In Round 2, "Tech Slang," teams received a question paper with two sets, each containing seven technical slang questions. Participants identified and wrote the correct technical keywords related to each sentence. Based on cumulative scores, the top six teams advanced to Round 3. Round 3, "SketchIt," involved teams drawing and guessing technical terms within a time limit. Words assigned included "Developer," "Cloud Computing," and "Artificial Intelligence."

The winners were a team from the 1st Semester, Department of AIML, consisting of Afiya Khanum and Maheen Siddiqua. A total of 44 students participated, and E-Certificates were awarded to all, recognizing their efforts and achievements. The event was coordinated by faculty and student volunteers.

Department Activities

Workshop Report on Future Ready with AI

On November 22, 2025, ATME College of Engineering in Mysore hosted a workshop titled "Future Ready with AI," organized by the Department of CSE-AIML and the IET Student Chapter. The event featured two prominent speakers: Mr. Chandan S, an AI Developer from Excelsoft Technologies, and Mr. Skanda P. M, a Generative AI Specialist. The workshop included hands-on sessions where participants engaged with various AI tools such as Kaggle, EMAi Studio, and Overleaf. Students learned to develop chatbots and explore AI agent workflows, providing them with practical experience in the rapidly evolving field of artificial intelligence. The primary goal of the workshop was to enhance the skills of students in AI technologies and their applications, preparing them for future challenges in the tech industry. The event saw active participation from third-year students specializing in Computer Science and Artificial Intelligence & Machine Learning, fostering a collaborative learning environment. Overall, the workshop successfully equipped students with valuable knowledge and skills, positioning them to be more competitive in the job market and contribute effectively to the field of AI.

Department Activities

Tech Nova

TECH NOVA 2K25 was a two-day event held on December 4th and 5th, 2025, organized by the Department of Computer Science and Engineering specializing in Artificial Intelligence and Machine Learning (CSE – AI & ML) at ATME College of Engineering, Mysore. The event aimed to foster innovation, technical skills, and collaboration among students, providing a platform for them to showcase their creativity and problem-solving abilities. The event commenced on December 4th with a welcome and briefing session, introducing participants to various challenges. One of the highlights was Pitch-O-Mania, where teams analyzed everyday objects like pen drives and smartwatches, identifying user pain points and proposing innovative enhancements. This activity encouraged critical thinking and creativity as students pitched their ideas to a panel of judges. Additionally, a Poster Design Competition focused on sustainability and effective communication through visual design. Participants were evaluated on originality, relevance, visual appeal, and overall impact, allowing them to express their ideas creatively.

The second day featured engaging puzzle-solving activities, including a cipher lock challenge, word grid logic puzzles, and UV math problems. These challenges tested participants' logical reasoning and teamwork skills, fostering a competitive yet collaborative atmosphere. The event concluded with the announcement of winners, with the team "Data Pirates" emerging victorious, followed by the runner-up team "Parallel Minds." All participants received certificates of appreciation, recognizing their contributions. Overall, TECH NOVA 2K25 successfully blended academic excellence with creativity and collaboration, inspiring students to think critically and innovate. The event highlighted the importance of teamwork and practical experience, preparing students for future challenges in the tech industry.

Student Article

Generative Artificial Intelligence (Generative AI)

Generative Artificial Intelligence, commonly known as Generative AI, is a type of artificial intelligence that can create new content such as text, images, music, videos, and even computer code. Unlike traditional AI systems that only analyze or classify information, generative AI learns patterns from large amounts of data and uses this knowledge to produce original outputs. It mainly works using deep learning models that are trained on large datasets.

Generative AI is widely used in many real-life applications. Chatbots use generative AI to answer questions and have conversations with users. Image generation tools can create realistic pictures from text descriptions. In education, generative AI helps students by explaining topics, generating notes, and supporting learning. In healthcare, it is used to create medical images and assist in research. Businesses also use generative AI for content creation, customer support, and decision-making.

One of the main advantages of generative AI is that it saves time and effort by automating creative tasks. It increases productivity and helps people work more efficiently. Generative AI can also provide quick solutions and personalized responses, making technology more user-friendly. However, there are some challenges associated with generative AI. It requires large amounts of data and powerful computers to work effectively. Sometimes, it may generate incorrect or biased information, which can cause problems if not carefully monitored.

Despite these challenges, continuous research and development are improving the accuracy and reliability of generative AI systems. Ethical guidelines and safety measures are also being developed to ensure responsible use of this technology. As generative AI continues to grow, it is expected to play an important role in fields such as education, healthcare, business, and entertainment. Overall, generative AI represents a major advancement in artificial intelligence and has the potential to shape the future of technology in a positive way.

Student Article

Deep Learning

Deep Learning is a subfield of artificial intelligence that focuses on enabling machines to learn from large amounts of data using multi-layered neural networks. It is inspired by the structure and functioning of the human brain, where information is processed through interconnected neurons. Deep learning models automatically learn features from raw data, reducing the need for manual feature extraction. These models are trained using large datasets and powerful computational resources to achieve high accuracy.

Deep learning techniques are widely used in applications such as image recognition, speech recognition, natural language processing, and autonomous systems. Popular deep learning architectures include Artificial Neural Networks (ANN), Convolutional Neural Networks (CNN), and Recurrent Neural Networks (RNN). These models have shown remarkable performance in tasks like facial recognition, medical image analysis, machine translation, and voice assistants.

One of the major advantages of deep learning is its ability to handle complex and unstructured data efficiently. It improves performance as the amount of data increases, making it suitable for modern data-driven applications. However, deep learning also has certain limitations, such as high computational requirements, long training times, and dependence on large datasets. Additionally, understanding and interpreting deep learning models can be challenging.

Despite these challenges, continuous research and advancements in hardware and algorithms are enhancing the efficiency and reliability of deep learning systems. Today, deep learning plays a crucial role in shaping intelligent technologies across various domains including healthcare, education, transportation, and business. Its growing impact highlights its importance in the future of artificial intelligence and smart systems.
