

DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

Workshop on “How Developers Build Websites/Apps”

The Department of Computer Science and Engineering, ATME College of Engineering, Mysuru, organized a **one-day workshop** titled “**How Developers Build Websites/Apps**” on **6th November 2025** from **2:00 PM to 5:00 PM** in the **Seminar Hall**. The workshop aimed to provide students with practical insights into modern web and app development practices, bridging the gap between academic knowledge and industry skills.

The event commenced with an introduction and welcome address by **Dr. Puttegowda D**, Head of the Department of Computer Science and Engineering, who also served as the **Convener** of the program. He highlighted the importance of hands-on learning and keeping pace with rapidly evolving software technologies.

The workshop featured **Mr. Chiranth S** and **Ms. Nikhila S**, both **Software Developers at ATEU Softwares**, as the **Resource Persons**. They provided valuable insights into the process of website and mobile app development, including planning, UI/UX design, front-end and back-end integration, and deployment techniques. The speakers also demonstrated real-world examples of how developers collaborate using modern tools and frameworks.

The session was highly interactive, with students engaging in discussions and gaining clarity on various development workflows. Participants expressed that the workshop was informative and inspiring, motivating them to explore the field of full-stack development further.

Objective:

Students will be learning front end technologies such as Javascript, Alltool.

DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

Dr Puttegowda D, Professor & HoD, Dept. of CSE addressing the students.

DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

Overall, the workshop provided an excellent platform for students to understand the real-world aspects of software development and strengthened their enthusiasm toward learning and innovation in web and app technologies.

Outcome:

- Students understood how theoretical concepts are used in real-world web/app development.
- students learned to break down software problems and design structured solutions.
