

INDUSTRIAL VISIT REPORT

DEPARTMENT OF COMPUTER SCIENCE AND DESIGN

AND

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING – CYBER SECURITY

1. Introduction

The Department of Computer Science and Design and Department of CSE – Cyber Security organized an enriching Industrial Visit to Infosys, Mysuru, on 11th June 2026. The visit aimed to bridge the gap between academic learning and industry practices while providing students with exposure to the latest developments in the IT industry.

Infosys is one of India's leading technology and consulting organizations, known for its contributions in digital transformation, cloud computing, artificial intelligence, software engineering, and enterprise solutions. The visit provided students with valuable insights into industry expectations, technological advancements, and professional development opportunities.

2. Objectives

- To provide students with practical exposure to the working environment of the IT industry and understand corporate culture.
- To bridge the gap between theoretical knowledge acquired in classrooms and real-world industry practices.

Affiliated to VTU, Belagavi, Approved by AICTE, New Delhi and Recognized by Government of Karnataka.

- To understand software development processes, project management methodologies, and digital transformation initiatives followed by Infosys.
- To explore the training and learning ecosystem of the Infosys Global Education Centre (GEC), one of the world's largest corporate training facilities.
- To enhance students' awareness of current industry trends, innovation practices, and workplace technologies.

3. Participants

A total of 30 members participated in the visit, comprising students from the Department of Computer Science and Design and Department of CSE- Cyber Security along with the faculty coordinator, Mr. Shashank Patil. The faculty coordinator supervised the event and ensured its smooth coordination throughout.

The journey began with enthusiasm and excitement as the participants departed from the college campus. Students discussed emerging technologies and career opportunities during the travel.

Upon reaching the Infosys campus in Mysuru, the participants were impressed by the world-class infrastructure, professional environment, and well-organized facilities.

Affiliated to VTU, Belagavi, Approved by AICTE, New Delhi and Recognized by Government of Karnataka.

4. Company Visit Overview

The participants were warmly welcomed by Infosys representatives. The session began with an introduction to the organization, its vision, values, global presence, and contributions to the IT industry. A special guest talk was conducted on Virtual Internship opportunities and the importance of continuous learning in the technology sector. The speaker emphasized the role of practical experience, project-based learning, and industry-oriented certifications.

The students were introduced to Infosys Springboard, a digital learning platform that provides access to courses in programming, artificial intelligence, machine learning, data science, cloud computing, and professional skills.

A key highlight of the session was the discussion on the collaboration between Infosys Springboard and Udemy, which enables learners to access high-quality courses for skill enhancement and career growth. Students were encouraged to actively participate in virtual internships, certification programs, and self-paced learning opportunities to remain competitive in the evolving technology landscape.

5. Conclusion

The industrial visit to Infosys, Mysuru, successfully fulfilled its intended objectives by providing students with valuable exposure to the professional IT industry environment and corporate work culture. The visit enabled students to relate the theoretical concepts learned in the classroom to real-world industry practices, thereby enhancing their understanding of how technology solutions are developed and implemented in large-scale organizations. Students gained insights into software development processes, project management practices, and the role of digital transformation in modern enterprises.

The visit also offered an opportunity to understand the extensive training and learning ecosystem available at the Infosys Global Education Centre (GEC), highlighting the importance of continuous learning and skill development in the IT sector. Furthermore, students were introduced to current industry trends, innovation-driven practices, and emerging workplace technologies, broadening their perspective on career opportunities and industry expectations. Overall, the visit proved to be an enriching learning experience that strengthened industry-academia interaction and motivated students to enhance their technical and professional competencies to meet future career challenges.
