REPORT ON PUBLIC AWARENESS PROGRAM ON “CYBER SURAKSHA ABHIYAN – CYBER FRAUDS”

Date: 31st January 2026

Timings: 5:00 PM to 7:00 PM

Venue: S. P. Bhat Hall, Institution of Engineers India, Mysuru.

The event was organized by **Department of CSE – Cyber Security** and the **Department of Computer Applications**, ATME College of Engineering, Mysuru, in association with the **Institution of Engineers (IEI)**.

The program was organized as part of the institution's commitment to social responsibility and community outreach, with the objective of creating awareness among the public about cyber frauds, online scams, and safe digital practices.

The expert session was delivered by **Mr. Akshay Nagaraj Naik**, CEO & Co-Founder of **Agamy Cyber Tech**, who addressed the audience on the growing menace of cyber frauds and the crucial role of user awareness in preventing cyber-crimes. He began by emphasizing that cyber-crime does not always require expert hackers; rather, it often succeeds due to a single careless click by users, making awareness the strongest line of defense.

Mr. Naik explained how cyber criminals exploit human behaviour through common fraud techniques such as phishing messages, fake links, OTP scams, impersonation calls, and fraudulent online communications. He highlighted how attackers take advantage of curiosity, urgency, fear, and lack of digital awareness to gain unauthorized access to personal and financial information.

The session focused extensively on **preventive measures**, where he advised participants to be cautious while clicking unknown links, sharing OTPs, or responding to unsolicited calls and messages. He stressed the importance of verifying digital communications, using strong passwords, enabling security features, and practicing safe online behaviour in everyday digital interactions.

He further emphasized the need for **timely action and reporting of cyber incidents**, stating that early reporting can significantly reduce losses and help authorities take corrective action. Through real-world examples and practical insights, the session empowered participants to stay alert, informed, and confident while navigating the digital space.

Overall, the talk was highly impactful and informative, reinforcing the message that **awareness, vigilance, and responsible digital behavior are the most effective tools to combat cyber frauds.**

Following the expert talk, **Dr. L. Basavaraj**, Principal, ATME College of Engineering, Mysuru, addressed the gathering and shared his **own experiences related to recent cyber activities.** He highlighted real-life incidents to underline how cyber threats can affect anyone and emphasized the importance of staying alert, informed, and proactive while using digital platforms. His address reinforced the need for responsible digital behaviour and timely reporting of cyber incidents to prevent financial and data loss.

Er. H. S. Suresh Babu, Chairman, Institution of Engineers (IEI), Mysuru, delivered Presidential address on the importance of **handling cyber issues with awareness and confidence rather than giving up.** He highlighted the need for timely reporting, learning from incidents, and empowering oneself with knowledge to combat cyber threats effectively.

The event was held under the patronage of **Sri L. Arun Kumar**, Hon. Chairman, ATMECE, Mysuru, with guidance from the management and academic leadership.

The program concluded with a **Vote of Thanks delivered by Sri M. K. Nanjaiah**, **Honourable Secretary**, IEI, Mysuru who expressed gratitude to the resource person, dignitaries, organizers, faculty members, students, and participants for their active involvement and support in making the event successful.

Overall, the program was highly informative and interactive, equipping participants with practical knowledge to recognize, prevent, and respond to cyber frauds, thereby contributing to building a safer and more cyber-aware society.
