

## DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING - CYBER SECURITY

### Report on Technical Talk on “Fundamentals of Algorithms and Their Real-World Applications”

A technical talk on the " **Fundamentals of Algorithms and Their Real-World Applications** " was organized for the 4<sup>th</sup> and 6<sup>th</sup> semester students of Departments of Computer Science and Design (CSD) and CSE-Cybersecurity (CY), on 17th March 2026, from 10:00 AM to 12:00 PM. The resource person for the session was **Prof. Padma Reddy A M, Founder Trustee, Vice - President, Dean of Department of Computer Science and Engineering (Data Science); Sai Vidya Institute of Technology, Bengaluru.** Prof. Padma Reddy with his expertise in the field of Computer Science provided valuable insights into the core and critical aspects of Design of algorithms and their practical applications.

Prof. Padma Reddy began the session by shedding light on the importance of algorithms and the need of understanding the design of algorithms for coding purpose. Further, he highlighted on multiple ways to design algorithms for multiple problems like finding the sum of series, sorting of the integers, Pattern Matching etc.

A significant portion of the session was dedicated to understand and design the algorithms along with coding. He concluded the talk by outlining the future scope of the field, emphasizing the importance of coding and improving the problem-solving skills which is need of the hour.

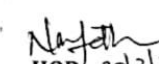

## DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING - CYBER SECURITY

The session was interactive, and students actively participated in the event, reflecting their keen interest in the topic. The talk was well-received and proved to be informative, bridging the gap between theoretical learning and practical applications which is essential for applying the same for real-world problems.
